

TRAINING PROGRAM IN BIOVIGILANCE & SAFETY MONITORING

10:00 AM – 5:00 PM  ONLINE

TRAINING WILL COVER:

- Fundamentals of biovigilance
- Risk identification and management specific to biologics
- Immunogenicity and viral transmission
- Adverse events following immunization (AEFI) reporting systems
- Safety surveillance for stem cells, tissue-engineered products
- Regulatory best practices for biovigilance in vaccines & advanced therapies

Key Focus:

- Cold-chain management & Its impact on product efficacy
- Real-world evidence & complex biologics datasets
- Readiness to support mass immunization programs
- Professional capability in the rapidly evolving biologics, domain

Who Should Attend:

Biovigilance Professionals

Vaccine Safety Officers

Microbiologists

Biotech Researchers

Regulatory Experts
